

## **HOD Great Yellow - Halogen bulb 3500 K**

Yellow light, high brightness bulb. Its advantage over Xenon bulbs is that it does not require converting electronics or complicated installation, it can be easily installed in place of normal Halogen bulbs. Its use is completely legal!

H.O. \_ D bulb means: HIGH OLIVE LAMP DEFINITIONS (high intensity Oliva bulb), refers to the shape of the bulb. It differs in size and shape from that of a traditional light bulb, thus providing excellent brightness and better dissipating the heat emitted by the bulb, so it has a longer lifespan than similar bulbs with increased brightness .

Features:

- 3500 Kelvin
- 2 bulbs/set
- 1800 Lumen brightness. (approx. 1000 Lumens for traditional halogen bulbs)
- 350 operating hours.
- Excellent focused light scattering.
- It is important that it contains mixed gases, NOT ONLY XENON gas, thus providing very good vision in all weather (snow, rain, fog).
- Porcelain socket.

The warranty is only valid for installation in a specialist workshop. We can only accept the installation by confirming it with an invoice!
